

Title:	House of little researchers
Implementation	
Field(s) of Action:	* Presence and Visibility
Objectives:	* Recruitment * Support teachers in planning of education and study staff
Target Group(s):	Pupils University employees/teaching staff at scientific organisations
Description:	<p>The “House of little researchers” is a programme that generates teaching materials for Elementary School teachers. The material is developed by university teaching staff and students. Offered programmes break down research and science topics make them accessible for children.</p> <p>The “House of little researchers” offers training to elementary school teachers on how to hold specific lessons on STEM topics. Participants interact with materials, recreate experiments and go through the lessons themselves. Although the trainings are aimed at teachers, they can also have an impact on children. They start to engage with the study of STEM from early childhood on. It can, thus help inspire interest in the natural sciences and encourage them to choose STEM fields in their further education.</p>
