Title:	ROBERTA - Learning with robots
Implementation	
Field(s) of Action:	* Presence and Visibility
	* Gender Dimension in Research and Education
Objectives:	* Promotion of technical and natural scientific studies and careers * Recruitment of female scientists * Creating interest in science
Target Group(s):	Pupils (Secondary and High school students) Students (undergraduate and graduate) Girls and young women; especially for school girls
Description:	The project ROBERTA makes technical education accessible for girls and young women in a playful way. It is made for 8-12 participants. The girls learn how to build their own, individual robot with an individual software.  Different methods and durations for the implementation are possible: in class, a special day/week, in the afternoon etc. Trips to the technical university in Berlin are inclusive.  A project like this can be run not only on robots, but also by doing physical experiments. There is also a possibility to handcraft models of physical phenomena.
